EXPERIENCE

Arth Consultancy Services

Sep 2024-Feb 2025

Data Analyst Intern

- Conducted data analysis using SQL queries, Python and Excel.
- Conducted web scraping and data extraction using Python libraries to extract relevant data.
-

Suyog Electricals Ltd

Apr 2025-May 2025

Software Developer-Trainee

- Developed and maintained backend functionalities using PHP and SQL for internal business applications.
- Worked on Python-based tasks and scripting assignments to support development and automation activities.
- Evaluated and tested various AI tools and automation platforms for potential business and workflow improvements.

Professional Projects | Data & AI

May 2025 - Present

- Transitioned focus toward data science, analytics, and applied machine learning through structured project-based work.
- Built customer churn prediction and pricing optimization projects using Python, SQL, and machine learning techniques.
- Designed end-to-end analytics workflows including EDA, feature engineering, and model evaluation.
- Maintained a portfolio of projects demonstrating practical business problem solving.

EDUCATION

Parul University

Dec 2022-May 2024

Master Of Computer Applications, CGPA: 7.5

Rofel BBA & BCA Collage

Aug 2019-May 2022

Bachelors of Computer Applications, CGPA: 7.24

SKILLS & OTHER

Programming: Python, SQL, Java, C++

Data Analysis: Pandas, NumPy, Microsoft Excel

Visualization: Power BI, Looker Studio

Machine Learning & AI: Scikit-learn, Machine Learning, Generative AI, Lang Chain, RAG

Databases: MySQL, MongoDB

Web Technologies: HTML, CSS, JavaScript

PROJECTS

Customer Churn Prediction

- Built a machine learning model using Python and Scikit-learn to predict customer churn based on demographic and service usage data.
- Performed data cleaning, exploratory data analysis (EDA), feature engineering, and model evaluation to identify key churn drivers.

SQL Analytics Dashboard

- Developed an interactive analytics dashboard using SQL, Python, and Power BI to track sales, profit, customer, and regional performance KPIs.
- Conducted data cleaning, aggregation, and business analysis to generate actionable insights from transactional data.

AI-Powered Document Chat Application

- Built a RAG-based document Q&A application using LLMs, embeddings, and vector search for semantic document retrieval.
- Implemented PDF upload, text processing, and context-aware answer generation using modern AI technologies

CERTIFICATIONS

- Artificial Intelligence** – NSDC
- Python for Data Science** – Reliance Foundation Skilling Academy
- Data Science Essentials** – Reliance Foundation Skilling Academy
